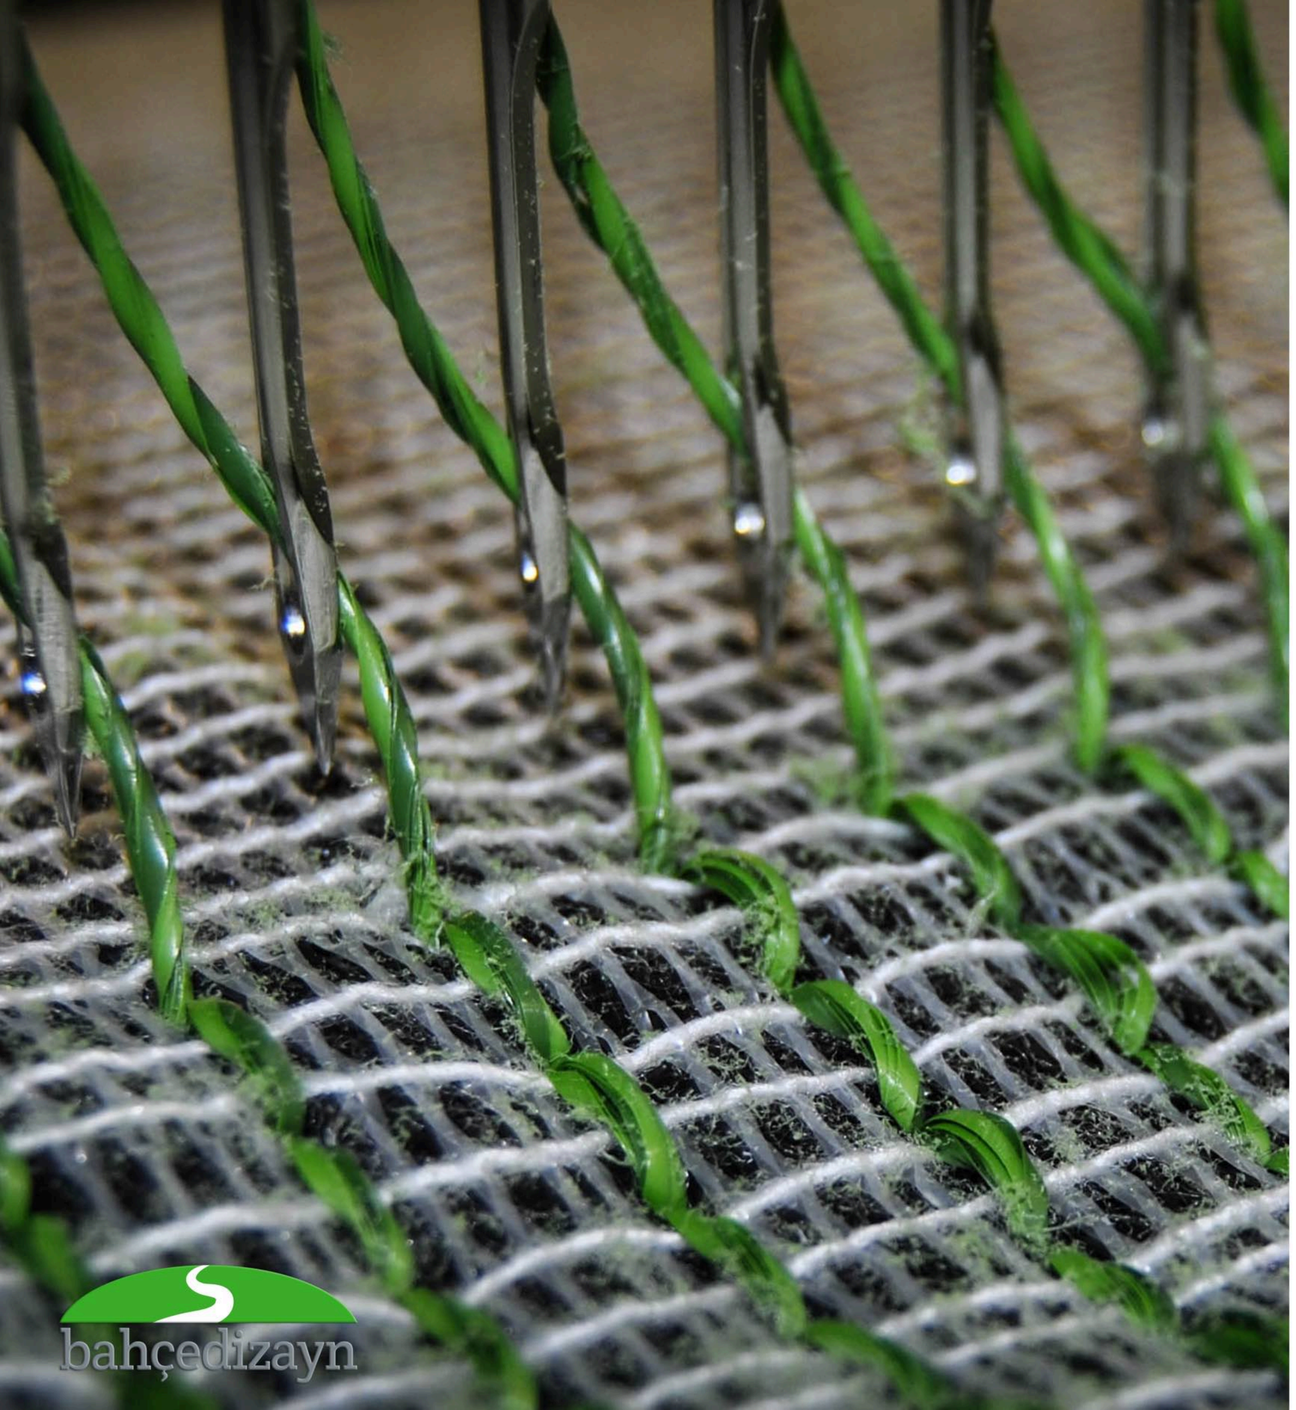
About Us

As BEKA SPORT Company, we now carry our 10 years of experience in the synthetic grass sector to the production of synthetic grass under BEKA GRASS brand. Our company has built sports facilities in various countries such as Bulgaria, Romania, Georgia, Albania, Serbia, TRNC, Egypt, Iran, Iraq, Jordan, Lebanon, Qatar, Sudan, Ghana, Syria, Tunisia and Azerbaijan for 10 years. We now offer the products serving for various application purposes, from standard football fields to mini football fields, multisport fields, tennis courts, golf courses and areas of decoration, under BEKA GRASS brand with years of experience and our own production.

As BEKA GRASS, our basic principle is to provide 100% customer satisfaction by means of production, sales and after-sales services. Our primary objective is to always stand by our customers regarding the potential problems that may occur after sales especially in the foreign markets and thus maintaining the value of our brand on the same level. Our key principle will be to keep up the excitement of sharing the know-how and experience we incorporated since the day our company was founded with you, our esteemed customers.

As BEKA GRASS, we manufacture products with various colours and models in accordance with FIFA norms. We will constantly continue offering new products to our customers with our long years of experience.



Production Facilities

As Beka Family, we take justified proud of offering our products to you in our own production facility under Beka Grass brand as a result of our success originating from quality, reliability and customer satisfaction.

We manufacture synthetic grass carpets in high-tech weaving machines in our production plant. Owing to the quality control system in our plant, the whole production process is meticulously inspected at all stages from production to quality control and thus our products are accurately delivered to our customers.

As Beka Family, we owe our customers a debt of gratitude for enabling us to reach our current position and promise you a sense of continuous R&D and quality in advance within the framework of our principle of "reliability", our distinctive characteristic.

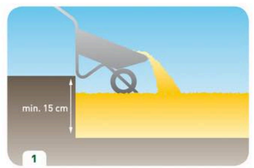
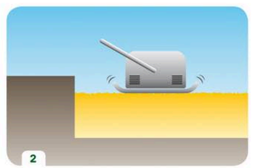
Installation

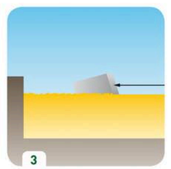
Beka Grass is a Unique And innovative Systems Providing A Perfect Shock Absorbing Flooring The System is Made From Frizzy Polyethylene Bre Providing An Exceptionally Strong And Durable Attractive Grass Available in6Attractive Colours.The Combinaion With a Soft,Shock-Absorbing Underlay Of PE Foam Makes The System Unique in its kind! The System AchievesOutstanding Values And A Maximum Critical Fall Height of3,2Mtr With A Relatively Thin, Light-Weight Underlay Construction Moreover The System Requires A Sand ll of Only5Kg per square metre and is certi Ed in Accordance WithThe EN1177:2008Standard BekaGrass issuitable for childrens playgrounds, Daycare Centres And public Playgrounds



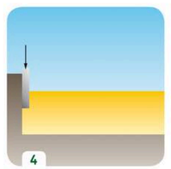
Excavate at least15Cmof earth and Down a bedof sand



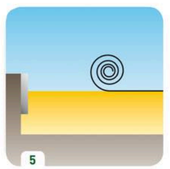
Use a vibrating plate compactor to Thoroughly compress the sand



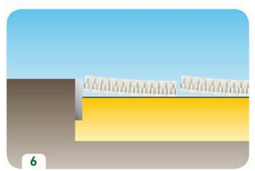
Level the sand bed MeticulouslyThe depth From edge to sand bed Depends on the system Used



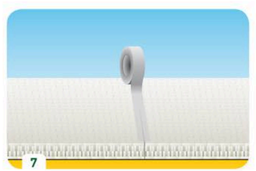
If desired, a concrete or Wooden edging can be Tted



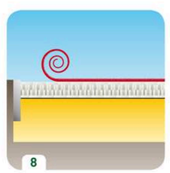
Roll out the geotextile on The sand bed to protect Against weeds Overlap Cmindividual rolls by 5-10Cm



Lay down the PE foam mats Thickness depends on HIC certi cation



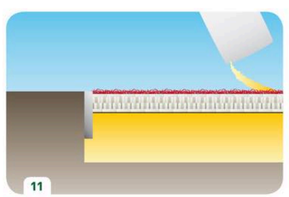
Tape up the seems between Individual PE foam mats



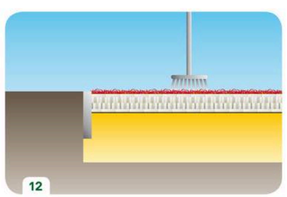
Roll out the arti cial grass Keeping the pile direction In mind Ensure there is an Overlap of afew Centimeters on all sides

Cut the arti cial grass To size lay down seam Tape between the joins And apply an even layer Of adhesive

Press the arti cial grass Ontothe adhesive and leave it to dry properly



Make a small slice at the bottom of the Sand bag and Fill the arti cial grass with Silica sand using5Kg/M2 Grain Size 1.25 - 0.25mm



Use a hard nylon broom to brush the Artificial grass against the piledirection To evenly disperse the sand
