 DRAINAGE
- 
 NO ABRASION
- 
 UV RESISTANCE
- 
 NO OVERHEATING PITCH

ARTIFICIAL TURF FOR PROFESSIONAL FOOTBALL GROUNDS

POLYETHYLENE STITCHING

The FIFA Quality Concept for Football Turf was developed in order to standardise the quality of artificial surfaces around the world, to ensure the safety of footballers and to promote continual, innovative development by artificial turf manufacturers.

THE FIFA QUALITY CONCEPT

The turf undergoes various laboratory tests, including the tensile strength of the joints. Other tests check the composition, durability and climatic resistance of the artificial turf.

This test measures the turf's shock absorbency and vertical deformation. The interaction between player and artificial turf is assessed by analysing slip resistance, traction, skin abrasion and skin friction.

Angled ball behaviour. One of several tests of ball behaviour, which measures the speed and bounce of the ball on the surface.

GOLF & CITY EQUIPMENTS

ARTIFICIAL TURF

BekoSport We are making mini golf courses at large main sites, parks, schools, municipal service areas and business centers with artificial grass. Mini golf courses that can play by every age group add value to your projects with the view. You can enrich the children's play-grounds, chess, billiards, and other basic .training areas with our products
