ABOUT US

As BEKA SPORT Company, we now carry our 10 years of experience in the synthetic grass sector to the production of synthetic grass under BEKA GRASS brand. Our company has built sports facilities in various countries such as Bulgaria, Romania, Georgia, Albania, Serbia, TRNC, Egypt, Iran, Iraq, Jordan, Lebanon, Qatar, Sudan, Ghana, Syria, Tunisia and Azerbaijan for 10 years. We now offer the products serving for various application purposes, from standard football fields to mini football fields, multisport fields, tennis courts, golf courses and areas of decoration, under BEKA GRASS brand with years of experience and our own production.

As BEKA GRASS, our basic principle is to provide 100% customer satisfaction by means of production, sales and after-sales services. Our primary objective is to always stand by our customers regarding the potential problems that may occur after sales especially in the foreign markets and thus maintaining the value of our brand on the same level. Our key principle will be to keep up the excitement of sharing the know-how and experience we incorporated since the day our company was founded with you, our esteemed customers.

As BEKA GRASS, we manufacture products with various colours and models in accordance with FIFA norms. We will constantly continue offering new products to our customers with our long years of experience.

PRODUCTION FACILITIES

As Beka Family, we take justified proud of offering our products to you in our own production facility under Beka Grass brand as a result of our success originating from quality, reliability and customer satisfaction.

We manufacture synthetic grass carpets in high-tech weaving machines in our production plant. Owing to the quality control system in our plant, the whole production process is meticulously inspected at all stages from production to quality control and thus our products are accurately delivered to our customers.

As Beka Family, we owe our customers a debt of gratitude for enabling us to reach our current position and promise you a sense of continuous R&D and quality in advance within the framework of our principle of "reliability", our distinctive characteristic.
