OUR STORY

Our journey, which we started by establishing mini Fields in neighboring countries, has grown step by Step to reach service to many countries of the world and Continues to increase. Our professionally continuing production And implementation projects, which we started with our customers' Trust behind us, have crowned our achievement with the experience We have gained. We were able to take our company to the top of the League with the fields we made in accordance with FIFA quality procedures. It is very proud of us not to be content with only football fields but to serve in All sports branches. We have activities in every sport ranging from basketball to American football, from tennis to volleyball, from athletics to golf. Our main goal Is to provide customer satisfaction from sales to project delivery with experienced And expert cadres.

GENERAL INFORMATION SBR+EPDM RUBBER TILE

The versatile EPDM + SBR surface is primarily used in areas and facilities for ball sports and leisure activities. Its smooth surface makes it an ideal surface for ball sports in schools and at various outdoor facilities. EPDM + SBR is waterproof; it is suitable to be used throughout the year in accordance with the weather conditions in all seasons. Can be laid flat but still resistant to slipping. Additional advantages include a high level of wear resistance and low maintenance costs. EPDM + SBR is always placed on a base layer. This provides constant shock absorption and keeping up appearance properties.
